COMPANY OVERVIEW

Technical sales & supply in South Korea.

Process Solutions / Solar Solutions

Connect Hive Co., Ltd. is a South Korean technical-products supplier. We combine product selection, technical coordination, supply and customer account management for industrial applications.

CORE MARKETS

Process Solutions

Filtration, single-use products and membrane separation for food, beverage and biopharma application review.

Liquid and gas filtration
Concentration and buffer exchange
Dairy UF application review

Solar Solutions

Solar measurement products and project coordination for performance assessment and site monitoring.

Irradiance and reference cells
Soiling and performance measurement
Installation-related coordination

SELECTED EXPERIENCE

Beverage filtration

Filter supply and technical support, including product selection, operating-condition review and customer follow-up.

Solar project support

Solar equipment structures: design and fabrication coordination, plus factory/site acceptance test (FAT/SAT) documentation support.

COMPANY FACTS

Founded November 2024
Location Anyang, South Korea
Business registration 872-88-03211

Registered address
Suite 33, 10F, 91, LS-ro 116beon-gil, Dongan-gu, Anyang-si, Gyeonggi-do, Republic of Korea

PRODUCT PORTFOLIO & APPLICATION REVIEW

Products for application review.

A functional portfolio for customers comparing options and manufacturers evaluating complementary market opportunities.

PRODUCT FAMILY	PRODUCTS & SUPPORT SCOPE
Filtration & single-use products	Food and beverage process filtration; biopharma filters; single-use bags and assemblies; integrated PUPSIT bags and filter integrity testers; UF/DF guidance.
Membrane separation & dairy UF	Heat-resistant spiral-wound membranes; PHILOS Megaflux-CRM ceramic membranes for dairy-UF review. Confirm UF grade/MWCO, later processing and final residual lactose. UF alone does not guarantee lactose-free milk.
Gas drying & humidification	Membrane compressed-air dryer; hollow-fiber membrane humidifier. Review flow, pressure, moisture target and integration requirements.
Solar & measurement	Solar irradiance sensors, reference cells and soiling measurement; weather, tracking and data acquisition; IV measurement.

Confirm suitability before selection. Review the actual membrane, wetted materials, cleaning approach and configuration. Biopharma production use requires separate installation-specific suitability and qualification review.

APPLICATION AREAS TO REVIEW

Areas for product-fit and feasibility discussions; not a list of completed installations.

- Food & beverage
- Biopharma
- Semiconductor & electronics
- HVAC & facilities
- Printing & packaging
- Agriculture & storage
- Industrial water & resource recovery
- Separation R&D
- Solar & measurement

MANUFACTURERS & CUSTOMER ENQUIRIES

A practical partnership. A clear enquiry.

We welcome manufacturers exploring a Korean sales and distribution partnership, as well as defined account-management roles within an existing sales network. Product scope, market coverage and responsibilities are agreed together.

01 Market development

Identify target applications, approach suitable customers and coordinate introductory meetings.

02 Technical coordination

Collect requirements, coordinate samples and evaluations, and support product selection with the manufacturer.

03 Sales & account management

Follow up on quotations, coordinate orders and delivery, and maintain local customer communication.

04 Project support

Coordinate agreed project information and documentation needs, including relevant FAT/SAT support.

USEFUL ENQUIRY INPUTS

Process or membrane enquiry
Feed and target outcome; flow and pressure; temperature; membrane or filter requirements; wetted materials; cleaning method; evaluation scale.

Solar or measurement enquiry
Measurement objective; site and mounting; environmental conditions; required outputs; data interface; project schedule.
